

PRESS RELEASE

Information transparency: published the 2024 budget forecasts

Châtillon, February 26, 2025

CVA's Board of Directors, by resolution of February 14, 2025, decided to expand and regulate the transparency of information to the public about CVA and its Group. While dutifully applying its own procedures for handling inside information, which are necessary to comply with legal obligations, the Board considers transparency to be a fundamental element of the company's social responsibility and sustainability.

Sharing information represents, in fact, a concrete commitment to the sustainability principles followed by the company that flow from an awareness of its social impact. For this reason, although it is not expressly provided for by current regulations, due to CVA's subjective legal status, it has decided *motu proprio* in this perspective to adopt a special procedure, publishing online, as of today, the new section of the group's website www.cvaspa.it "Information Transparency."

Published within it are the Self-Regulatory Procedure on Information Transparency, data on the composition of the bodies of Group companies, sustainability initiatives implemented in the last quarter of 2024, and highlights on the Group's FY 2024 consolidated economic and industrial forecasts.
